

Week 6

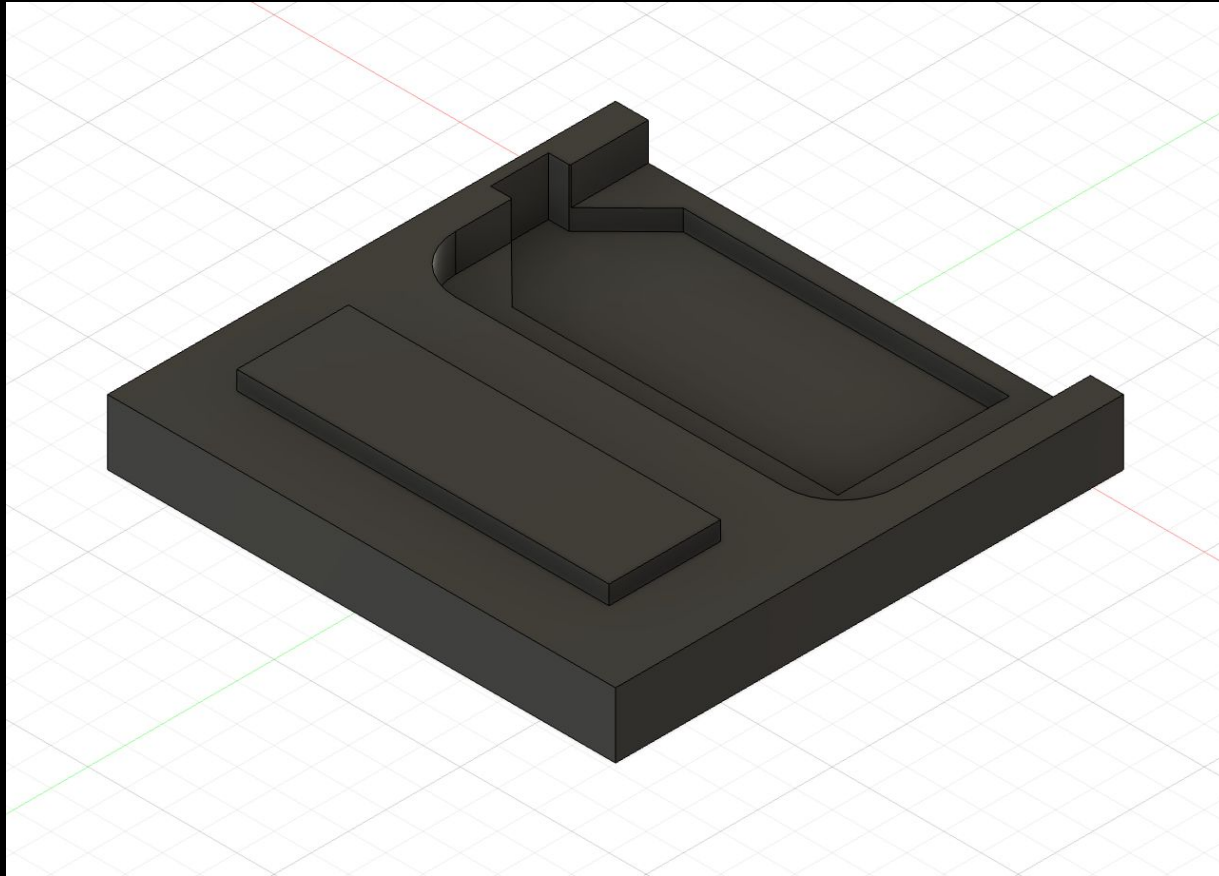

Progress

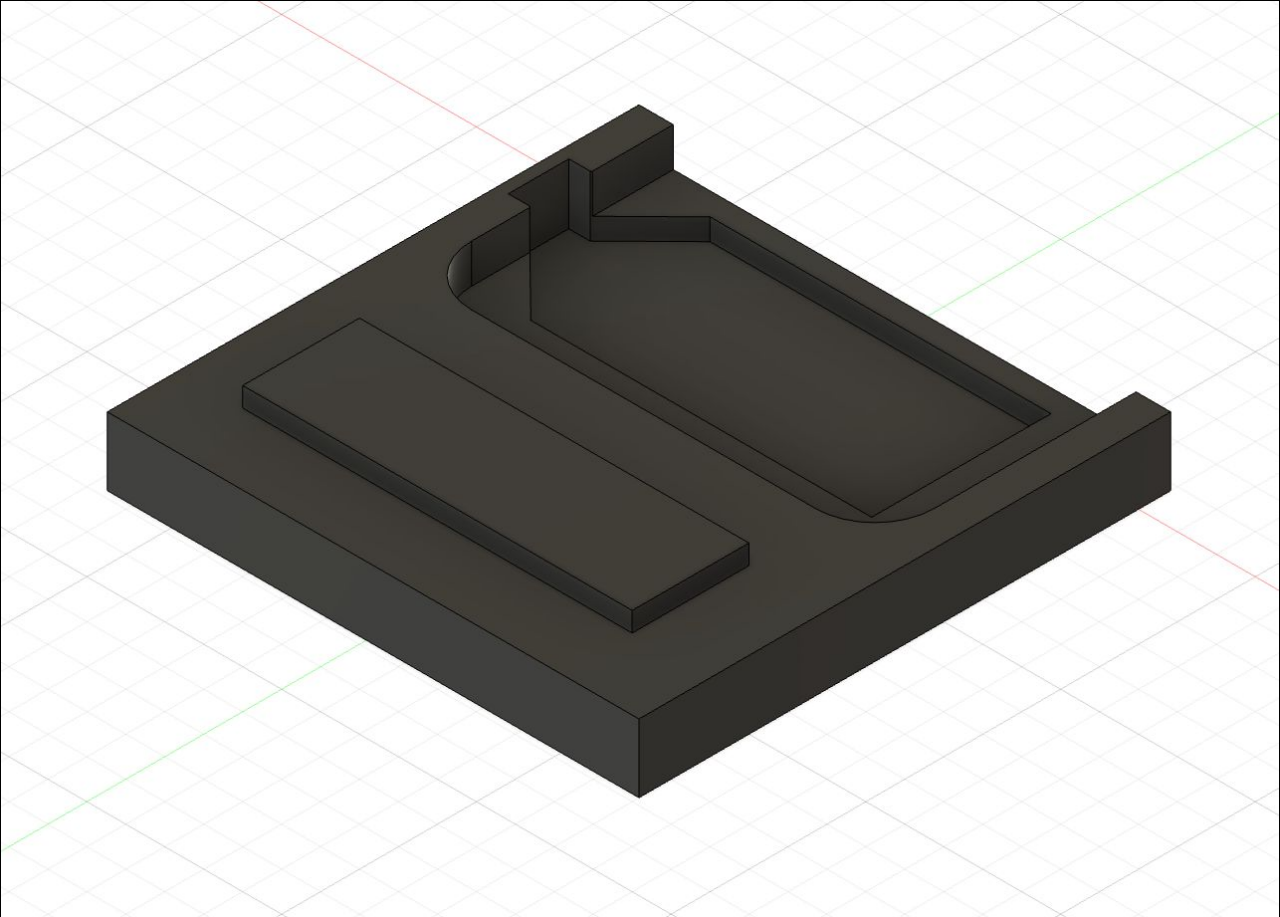

New CAD Pt1 Cam Holder

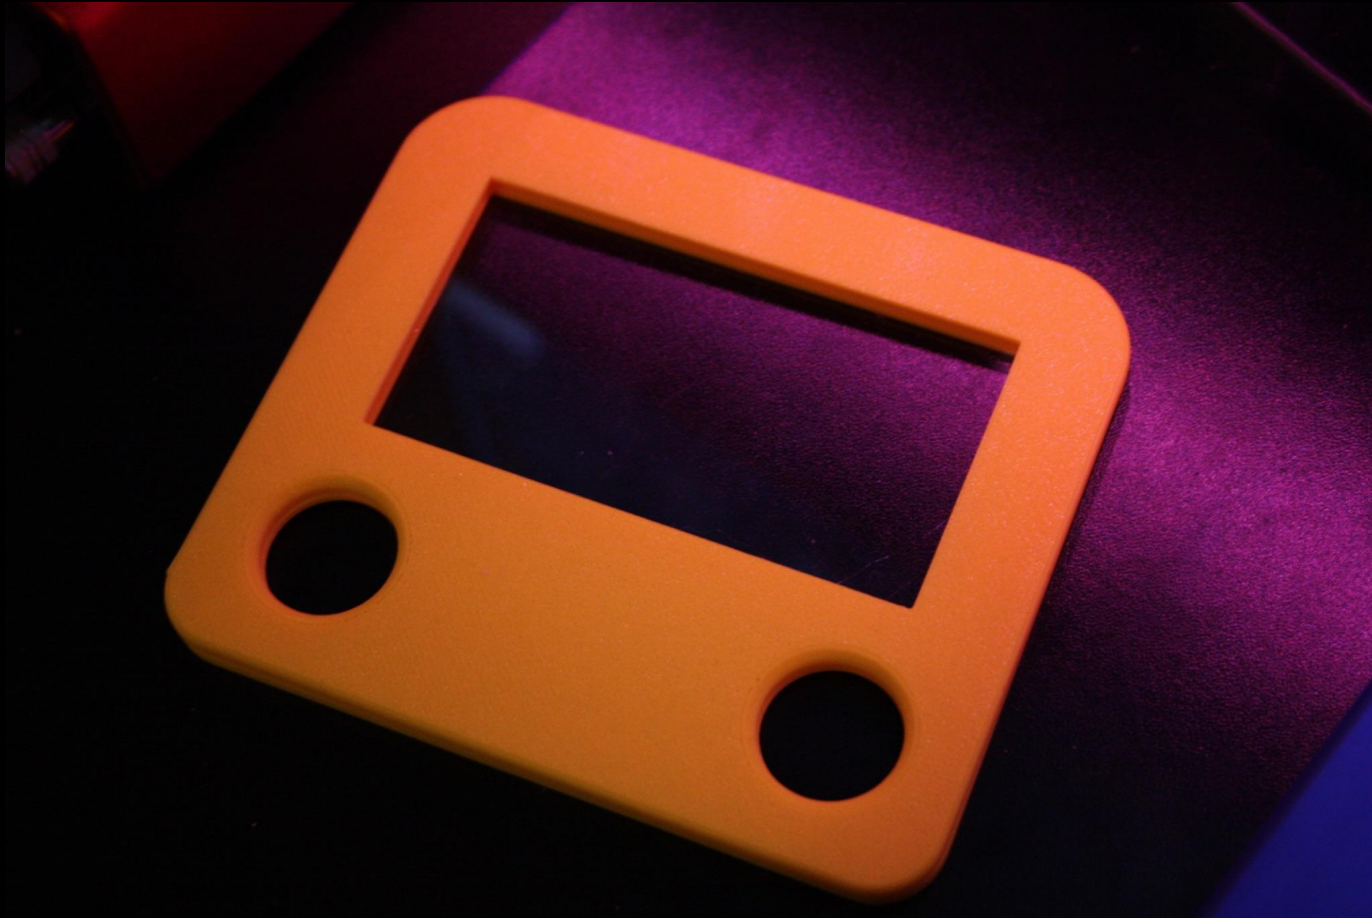

New CAD Pt2 Backlight Holder

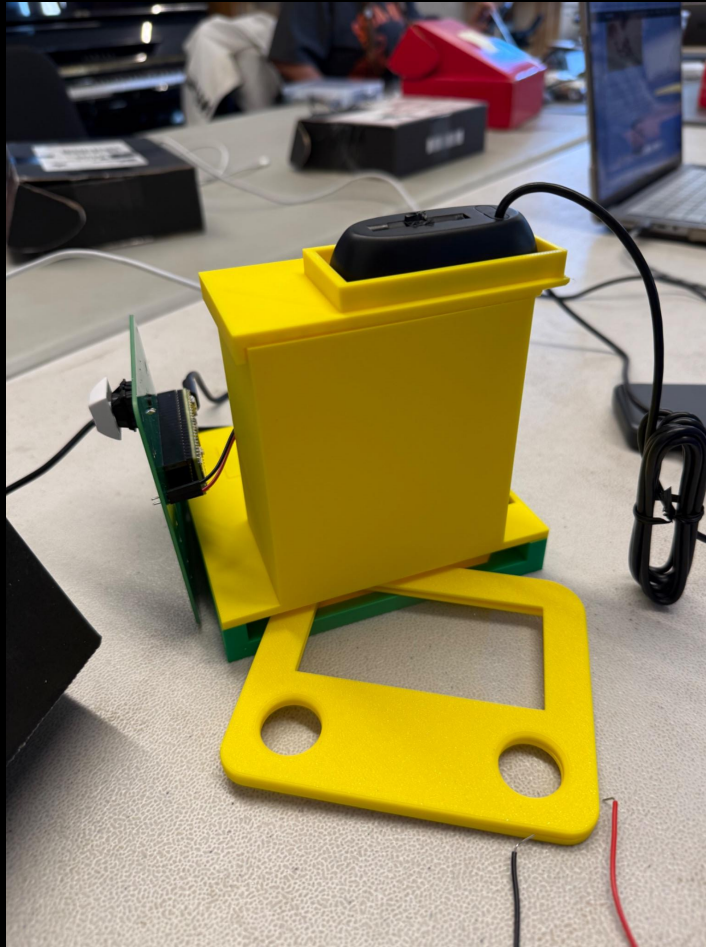

Mew CAD Pt 3 Connection Piece

New Plexiglass Casing(Fixed Thumb Holes)

Finished Midterm Device + Soldered PCB

Camera Connection Code Fix

```
int setcamIndex = -1;
for (int i = 0; i < cameras.length; i++) {
    println(cameras[i]);
    if (cameras[i].contains("C270")) {
        setcamIndex = i;
    }
}
if (setcamIndex != -1 || test) { //allows the program to run eve when device is not connected while testing
    if (test) {
        cam = new Capture(this, 850, 900, "pipeline:avfvideosrc device-index=0", 30);
    } else {
        cam = new Capture(this, 850, 900, "pipeline:avfvideosrc device-index="+setcamIndex, 30);
    }
    cam.start();
} else {
    //display no camera connected dialouge
    wait(5000);
    exit();
}
```

App V1

The screenshot displays the Smpl A Sketch application interface, which is designed for audio synthesis. The background features a stylized, colorful landscape with mountains and a river.

Help Window: This window provides instructions for using the application. It includes sections for the Main Window, Waveform Editor, and Envelope Editor, detailing how to connect the application, open editors, and control various parameters.

Main Window: The central window, titled "Smpl A Sketch", displays a red sine wave on a white background. Below the waveform, there are two green circular controls labeled "Mode" and "Vol." (Volume).

Envelope Editor Window: This window allows users to adjust the envelope parameters of the audio signal. It includes a "Sustain Mode" checkbox, a "Device Control" checkbox, and three sliders for "Attack", "Sustain", and "Release".

Waveform Editor Window: This window provides a visual representation of the audio waveform. It includes a "Waveform Editor" title bar, a "Device Control" section with a "Use Default Waveforms" checkbox, and a grid of six different waveform icons (sine, square, triangle, sawtooth, etc.) for selection.
